**CALL FOR PAPERS:
DEADLINE EXTENDED TO NOVEMBER 23!**

We have extended the deadline! We have already received some submissions for papers but we also have received lots of communication from people who could not quite make our deadline. We will now be accepting submissions until November 23.

Go to www.precisiondairy2010.com/callforpapers.html for instructions on how to upload your paper. See the website for the many categories of dairy management in which your submission might fit. The emphasis is on practical applications of precision technology in dairy management however, leading edge technology that has not reached field application will be featured in the exciting pre-Conference Symposium.

Please consider these sessions when deciding the best category for your paper.

- Robotic Milking (Multiple Sessions)
- Health Management
- Reproductive Management
- Feeding and Nutrition Management
- Solutions for Profitability
- Milk Quality
- In Barn Technologies

Multiple sessions are planned for the Robotic Milking Category. Health Management will also include technologies that improve dairy animal welfare. If you are unsure of the exact category in which to submit your paper, the editorial committee will place it in the appropriate session.

TUESDAY MARCH 2 PROGRAM

Be sure to include the Tuesday Program in your plans to attend the Conference. The pre-Conference Symposium will focus on the cutting edge and developing technologies and systems development.

The evening, part of the Main Conference, will be a reception hosted in the Display Area for all registrants. Following the reception will be a Producer Forum of four innovative dairy producers who will describe their experience with precision technologies and what they see as their needs for the future!

The opening day will include from developmental technology to on farm producer experience – Don't miss it!

10 REASONS TO ATTEND PRECISION DAIRY 2010
Reason #4 Innovative Producer Forum Tuesday Evening, March 2.

AFIMILK YOUNG SCIENTIST AWARD.

Afimilk is proud to sponsor the Afimilk Young Scientist Award. The purpose of the award is to encourage excellence in dairy research and communication of results by young investigators.

The winner will receive a certificate and a cheque for \$1,500 CAD. The runner-up will receive a certificate and cheque for \$500 CAD.

Eligibility

Eligibility for the Award is restricted to the following:
(i) Graduate students enrolled at a University or a Post-Doctoral researcher who is less than 2 years since the completion of his or her PhD; AND
(ii) Investigator is the first author of the paper concerned, having made a substantial contribution to the planning, execution, analysis and preparation of the information presented.

Check our website for details:

<http://www.precisiondairy2010.com/youngscientist.html>

The deadline for submissions has been extended to November 23 so it is still possible to qualify for this Award!

PLATINUM SPONSOR: INSENTEC/AGCO

We welcome and highlight one of our Platinum sponsors: Insentec/Ag-co

INSENTEC manufactures products and services based on variety of applications in sensor technology including animal ID, Unipuls milk measuring, concentrate feeding, and the Galaxy-Starline robotic milking system. The Galaxy-Starline uses a 2-box system with a flexible configuration of the boxes in parallel or tandem position, for considerable cost savings per stall. The latest sensor technology is used to monitor on-line the milking process and milk quality and a dedicated computer program monitors and manages the milking process. The milking system has been designed for optimum comfort for each animal. Ag-co is a major supplier of livestock housing equipment located in Sebringville, Ontario, Canada, and is the regional distributor for the Galaxy-Starline.

IMPORTANT DATES

November 23, 2009

Last Date for manuscript submission
January 8, 2010

Last Date for Early Bird registration
